Overview

The CRI Pediatric BioBank & Analytical Tissue Core, a research-supportive facility, directed by the Division of Pediatric Pathology with major support from the MACC Fund, is housed on the 4th floor of the TBRC/CRI building and provides quality-controlled banking of human pediatric tissue, blood, bone marrow, and other biological samples for use by investigators both internal and external to MCW and its affiliated institutions.

If you are a researcher seeking pediatric biological samples, please contact the bank's Scientific Director to determine if we have samples to match your research needs.

Hours: Monday - Friday 9:00 am-4:00 pm

Common users of the facility: cancer and developmental biology researchers
