**RESULT**

Field Testing of Starting Strong’s “Referral” application is underway. Evaluations of efficiency and ease of use will be gathered from individuals who use the application. Final changes will be made based on the evaluation feedback.

**CONCLUSION**

Starting Strong was developed based on the need for an integrated database for Birth to 3 programs in Milwaukee County. Based on preliminary testing and feedback, the system will improve healthcare delivery by:

- Accurately and reliably determining the prevalence and rate trends for children with developmental disabilities
- Providing efficient, integrated services for children with developmental disabilities
- Tracking the success, costs, and benefits of those services
- Evaluating and improving those services.

**ACKNOWLEDGEMENTS AND CONTACT**

- This project was supported in part by grants from the Healthier Wisconsin Partnership Program, the Center for Urban Population Health, and the Helen Bader Foundation, Milwaukee, Wisconsin.
