

## Hands-on training

Our course features hands-on training with state of the art simulators including the Laerdal SimMan and the TruCorp AirSim Multi. We will practice:

- Laryngoscopy
- Bougie
- Intubating laryngeal airways
- Rescue ventilation devices
- Optical stylets
- Surgical airways

Our focus is to equip you with skills you need to manage your next emergency airway.

## Why this course?

This course is designed for all acute care providers who have the challenge of managing the emergency airway, whether in the ED, the ICU or the back of an ambulance. Our focus is not on the difficult airway, but developing a strategy for managing *every* emergency airway.

The focus of our course is on practical solutions to the airway management problems you face as an acute care provider. This course is not a “show and tell” of shiny new devices. We want to equip you with techniques that work and can be easily applied with your next emergency airway.

This course receives no industry support.

Participants with special needs or accommodations are asked to call 414-805-6455 for assistance.

## Emergency Airway Management

### Course topics:

#### Airway decision making

*To RSI or not to RSI*

#### RSI and patient safety
