Are you interested in biomedical research?

Each summer, the Office of Student Affairs/Diversity at MCW-Milwaukee offers its signature programs to promote diversity in the medical field and provide an exceptional gateway to clinical careers. MCW’s summer enrichment programs are designed for students from backgrounds that are historically underrepresented in medicine and biomedical research.

**Diversity Summer Health-related Research Education Program (DSHREP)**

DSHREP is supported through an R25 research education grant funded by National Heart, Lung, Blood Institute (NHLBI), an agency of National Institutes of Health (NIH).

**Program Dates**

May 31 - August 5, 2016

**Application Deadline**

February 1, 2016 by 5 p.m. CST

APPLY TODAY!

Your Future Starts Here!
