FACTS 2014
GREEN BAY CAMPUS

THE NEED
National, regional and statewide studies all point to a significant shortage of physicians in Wisconsin and the U.S. in the next 20 years. In addition, there is a maldistribution of physicians across Wisconsin resulting in areas where the greatest needs for physicians are unmet.

GREEN BAY STRENGTHS
• Strong health systems with outstanding physicians and established programs for student clinical rotations
• Quality academic institutions with a scientific program infrastructure
• Enthusiastic civic and business engagement and support

NEED FOR PHILANTHROPY
• Philanthropic investment is critical to launch this program
• Your philanthropic gift will allow us to recruit and retain leading faculty and program leaders, invest in cutting-edge technologies and create state-of-the-art facilities.

OUR VISION: MCW-GREEN BAY
Working with partners in Green Bay, the Medical College of Wisconsin (MCW) is developing an innovative, community-based medical education program to increase the physician workforce in Northeast Wisconsin.

• Collaboration with academic institutions and clinical partners in the Green Bay region is a centerpiece
• The target date for the first class of 20 students is 2015; increasing matriculation to 25 students in subsequent years
• Academic partners provide faculty, classroom and administrative space, as well as medical simulators
• Clinical partners provide patient care experiences for students and residency training positions for graduates

PROGRAM STRENGTHS
• Startup expenses are reduced by sharing existing facilities
• Employs an immersive education model in which students receive their entire education in the Green Bay region
• Structured to reduce medical student debt and allow quicker entry into the physician workforce
• Engaging the Green Bay partners in the admissions process to help select students desiring to practice in Northeast Wisconsin
• Developing new residency training positions in Green Bay to help retain graduates as physicians in the area
