

Evaluation of the Enhanced Care Program (ECP)

ECP was established as a comprehensive program to support GIM patients with complex healthcare needs

Project Lead: Liliana Pezzin, PhD, JD
Medicine – General Internal Medicine

CHDS team members:

- **Ann Nattinger, MD, MPH**
- **Emily McGinley, MS, MPH**
- **Jeanne Tyszka, MA**

Other team members:

- **Julie Mitchell, MD, MS**
- **Brian Hilgeman, MD**
- **Ted MacKinney, MD**
- **Jeana Holt, DNP, MSN**
- **Mandy Kastner, MPH**
- **Greg Stadter, MPH**
- **Nick Wagner, Data Analyst**

Evaluation of the Enhanced Care Program (ECP)

Recognizing the importance of addressing social determinants of health that often contribute to ongoing health challenges, ECP offered a broad suite of services

- Two variants – intensivist and primary care provider – were compared to each other and to a “control” group to determine the program’s impact on hospital utilization measures

- Our team provided a retrospective record review of the interventions compared to usual care

- Clinical partner: Froedtert & MCW

Completed: February, 2018
