

Research Study of Health-Related Social Needs, Chronic Kidney Disease, and Type 2 Diabetes

ABOUT THIS RESEARCH

This is a 2-hour, one time research study looking to identify and understand barriers to care in order to develop better interventions to improve health outcomes, quality of life, and self-care behaviors for adults with Diabetic Kidney Disease, who also experience health-related social needs such as lack of stable housing, finances, food, transportation, utilities, and concern for safety. This research study will include 300 African American community members with Diabetic Kidney Disease.

WHAT THIS RESEARCH STUDY INCLUDES

Every participant will be asked to complete a 1-hour long survey. This survey will go over questions regarding Type 2 Diabetes, Chronic Kidney Disease, health-related social needs, as well as questions pertaining to self-care and lifestyle behaviors. All eligible participants will be paid \$50 for their time in completing the survey and labs to measure HbA1c, LDL and kidney function.

CRITERIA FOR JOINING

- Age 18 years or older
- African American
- Have type 2 diabetes
- Have chronic kidney disease or on dialysis
- Have 1 or more health-related social need

IF YOU ARE INTERESTED

Please call us, we will ask you a few questions over the phone to see if you meet all the criteria
