

MCW Center for Microbiome Research Seminar Series 2023 - 2024

Seminars are Tuesdays at 11:00AM. Location is noted for each seminar. Zoom links are included.

October 10, 2023

Sebastian Winter, PhD

Associate Professor, Department of Internal Medicine, Division of Infectious Diseases, University of California, Davis
Metabolism-Based Interactions Between Host and Microbes in the GI Tract

Seminar location: HUB A1035

November 7, 2023

Vanessa Leone, PhD

Assistant Professor, Department of Animal Biologics and Metabolism, University of Wisconsin, Madison
Dominant and Secondary Drivers of Host-Microbe Diurnal Rhythms in Metabolic Dysfunction

Seminar location: MACC Fund Research Center M3075

February 20, 2024

Erika Claud, MD

Professor, Department of Pediatrics, Director of Neonatology Research
Professor, Grossman Center for Quantitative Biology and Human Behavior
Inaugural Director, Center for the Science of Early Trajectories (SET)
University of Chicago and Comer Children's Hospital

The Microbiome and the Preterm Infant: Looking beyond Necrotizing Enterocolitis

Seminar will be online livestream only.

March 19, 2024

Xue-Zhong Yu, MD, MS, MBA

Professor, Immunology and Medicine
Endowed Scholar and Associate Director of Basic Sciences, MCW Center
Medical College of Wisconsin

Control of Graft-versus-Host Disease by Probiotics with Individual Commensal Bacteria

Seminar location: HUB A4520/A4628

Please contact the Center for Microbiome Research for
additional information at biomecenter@mcw.edu
