

INCREASING CARDIAC ARREST SURVIVAL THROUGH DISPATCHER ASSISTED BYSTANDER CPR

State of Wisconsin Training for identifying
patients who are pulseless and not
breathing

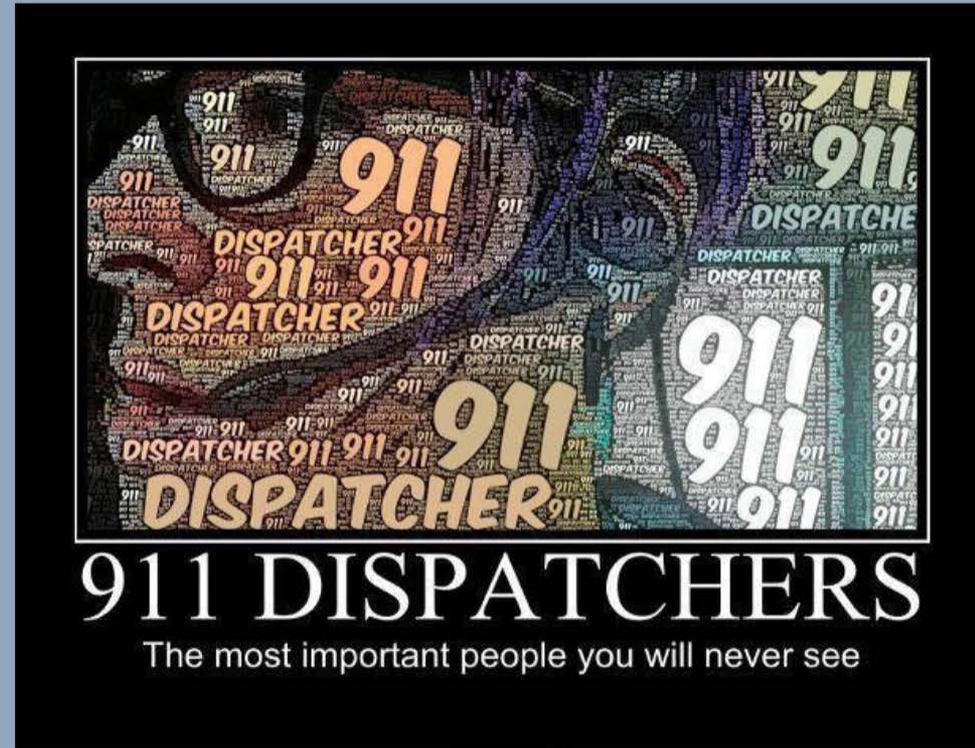

Disclosure:

This work is supported
by funds from
Advancing a Healthier
Wisconsin's Change
Maker Program

Program Overview

TOPICS TO BE DISCUSSED

- Project Overview
- Identifying Cardiac Arrest Patients to Transfer for Dispatch Assisted CPR

PROJECT VISION

To give EVERY 9-1-1 Caller
the OPPORTUNITY to be a
first RESPONDER

CURRENT WISCONSIN CPR STATISTICS

CPR PROVIDED PRIOR TO
EMS ARRIVAL

19.7%

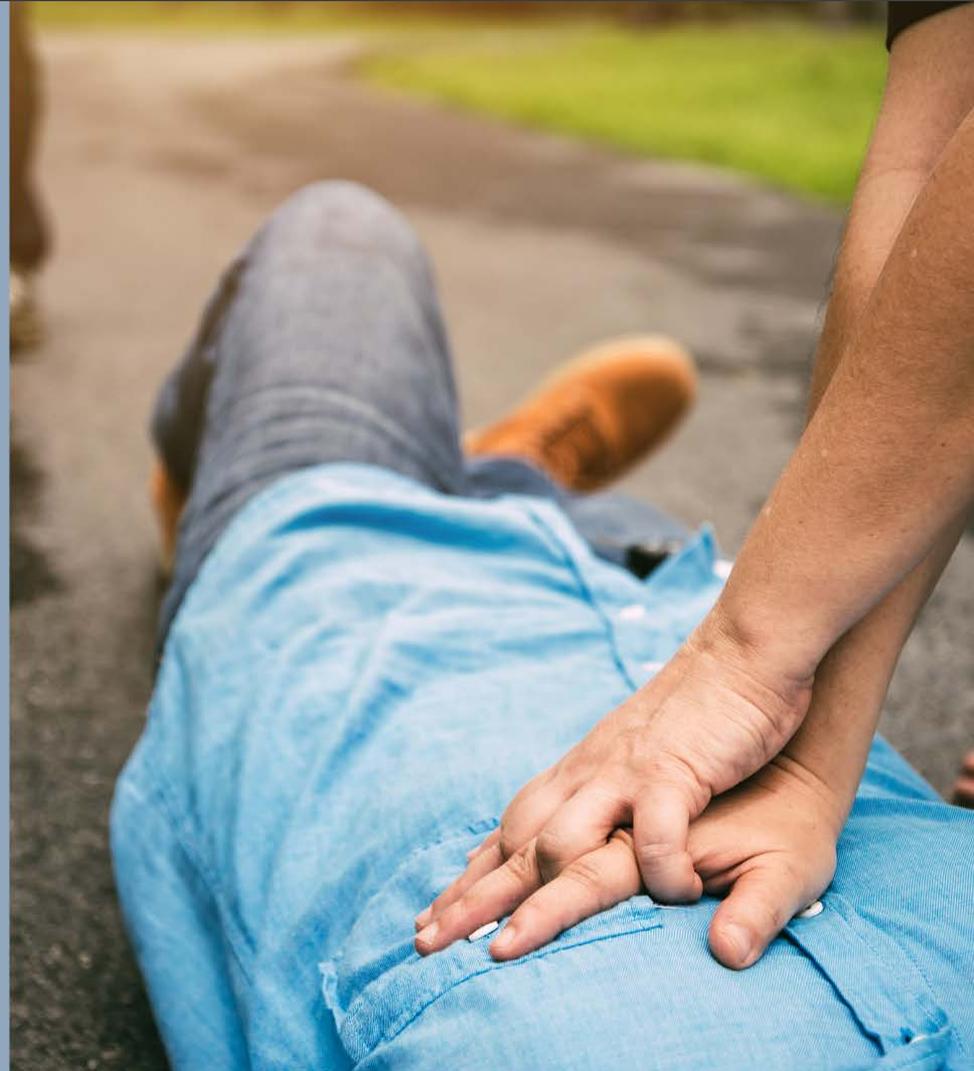

THE CALL

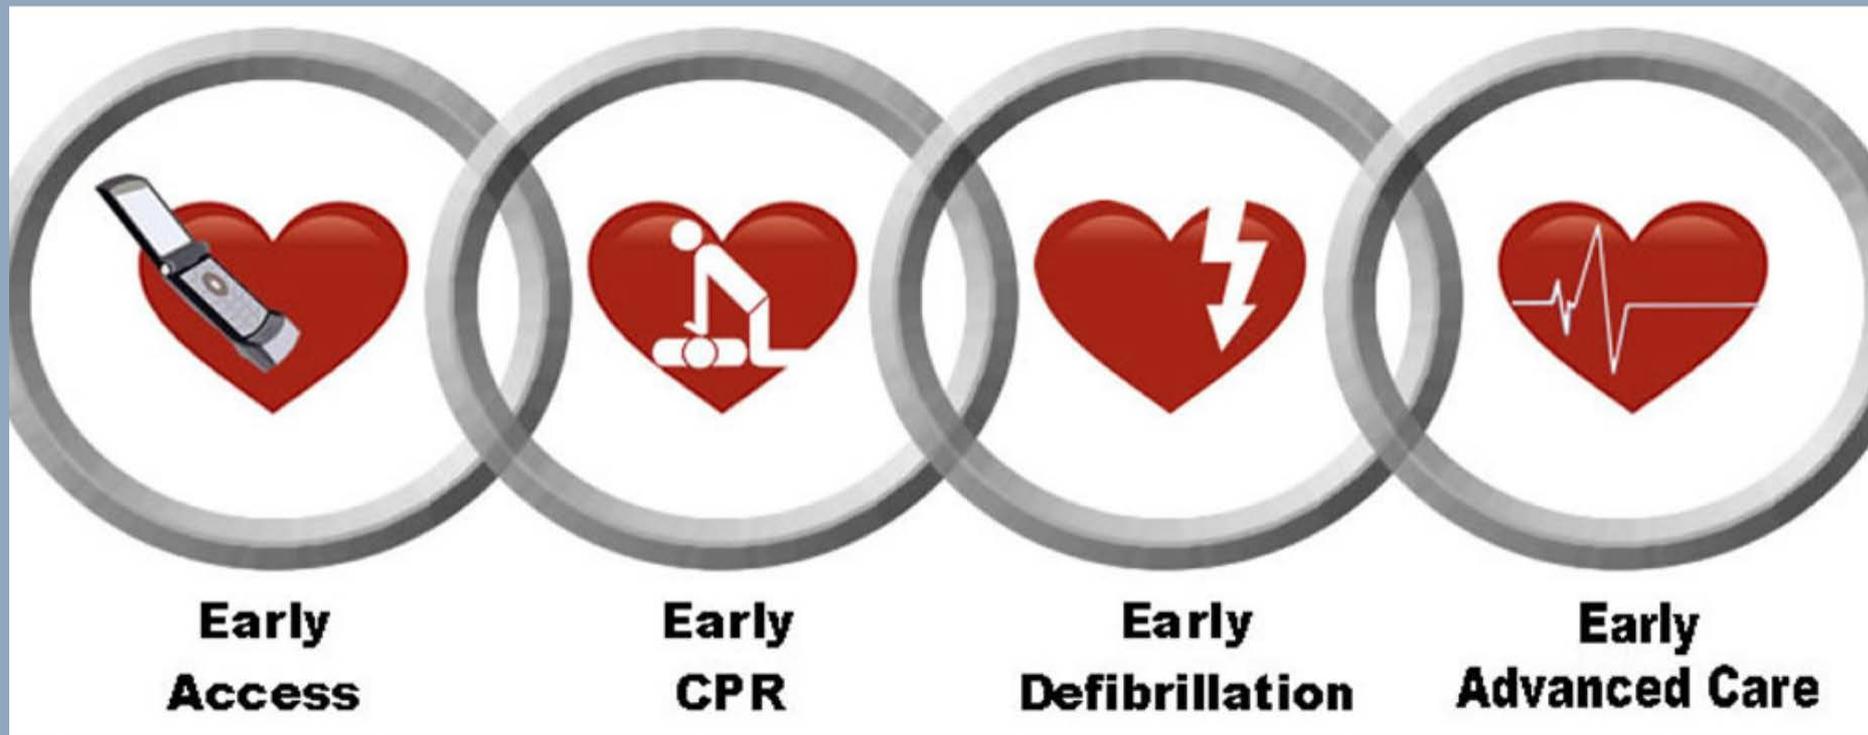

THE GOAL

- Thoughts about the call?
- Without the Dispatcher's directions what would have happened?
- How did the Dispatcher Sound?
- Did it work?

CHAIN OF SURVIVAL

PROGRAM FOCUS

- Decreasing time to Compressions
- Increasing the chances of Survival

A woman with blonde hair, wearing a pink long-sleeved shirt and dark pants, is leaning over a person lying on the floor. She is performing CPR, with her hands on the person's chest. The person lying on the floor is wearing a pink long-sleeved shirt and blue jeans. The background shows a living room with a wooden table, a chair, and a window with lace curtains. A large blue circle is overlaid on the left side of the image, containing the text.

IDENTIFYING PATIENTS WHO NEED CPR

State of Wisconsin
PSAP Transfer Training

A woman with dark hair, wearing a headset and a pink shirt, is seated at a desk in a control room. She is looking at a computer monitor and has her hand on a mouse. The room is dimly lit with blue light from the screens. The background shows shelves with various equipment and papers.

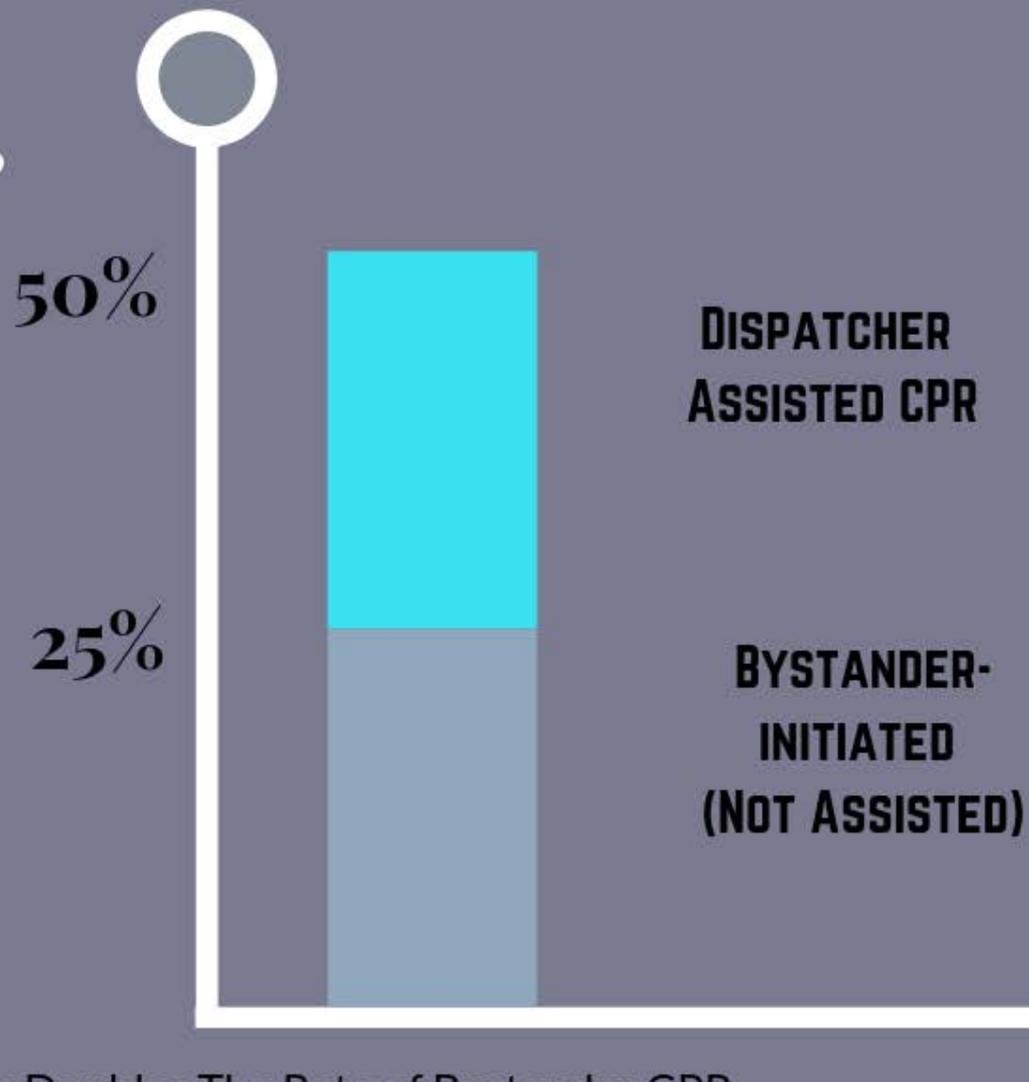

GOALS FOR DISPATCHERS:

- Facilitate rapid Cardiac Arrest identification
- Instill Bystander Confidence
- Coach Competent CPR

KING COUNTY SEATTLE, WA

Study from 1985-2015

Dispatcher Assisted Instruction Doubles The Rate of Bystander CPR

CARDIAC ARREST SIGNS

- Sudden, unexpected collapse
- Unconscious
- No signs of life

CARDIAC ARREST SIGNS

- Abnormal Breathing (not NORMAL)
- Brief Seizure

ALL CALLER INTERVIEW

2- KEY QUESTIONS

- IS THE PATIENT CONSCIOUS?
- IS THE PATIENT BREATHING NORMALLY?

NO

NO

GO

- DISPATCH ASSETS
- TRANSFER CALL

All Caller Interview

NO- NO - GO

IS THE PATIENT CONSCIOUS (AWAKE)?

- **YES:**

Respond as usual (uses appropriate Chief Complaint)

- **No:**

Go to STEP 2

- **Unsure?**

Tell the caller to go check- wait on the line

CPR

CPR

All Caller Interview

NO- NO - GO

IS THE PATIENT BREATHING NORMALLY?

- **YES:** Respond as usual (use appropriate Chief Complaint)

- **NO:** Dispatch Assets
Read Appropriate Protocol- Give Verbal direction

2- NO's and a GO

Callers reporting a person unconscious and not breathing normally require an ALS response and immediate CPR instruction

2- NO's and a GO

- **PSAP WILL TRANSFER CALL OR INITIATE INSTRUCTIONS**

"Ok, Sir/Ma'am I am sending an ambulance now. I am also transferring you to my partner who will give you more directions....."

2- NO's and a GO

- **ONCE RECEIVING AGENCY ANSWERS - PSAP STATES:**

"This is ____ dispatch center. I have a caller reporting as ____ (age if known) PNB (give any pertinent details ex. post drowning, electrocution). Unit ____ has been dispatched"

AGONAL BREATHING

SLOW, PASSIVE &
INEFFECTIVE
BREATHING.

Not NORMAL

CHEST DOES NOT
RISE AND FALL
NORMALLY

Ex:
A Rhythmic
Pattern

Caller often mistakes as breathing

IS THE PATIENT BREATHING NORMALLY?

DON'T BE FOOLED BY AGONAL RESPIRATIONS

"GASPING"

"SNORING"

"SNORTING"

"SIGHING"

"GURGLING"

"PUFFING"

"LIGHT BREATHING"

"LABORED"

"SHALLOW"

Common Delays in Delivering CPR

- Unnecessary questions asked
- Caller not near patient
- Dispatcher didn't ask Key Questions correctly
- Deviation from protocols

Common Delays in Delivering CPR

REMEMBER:

- Studies show that giving CPR to individuals not in Cardiac Arrest does MINIMAL harm
- Not giving CPR when someone is in Arrest significantly decreases their chances of survival
- Our script does not require Dispatchers to verify Cardiac Arrest

THE PROCESS

STATE OF WISCONSIN PSAP TRANSFER INSTRUCTIONS

- Identify Cardiac Arrest
2 No's and A Go
- Ensure Responding Units are Dispatched

THE PROCESS

STATE OF WISCONSIN PSAP TRANSFER INSTRUCTIONS

- Transfer Call to the EMS Comm Center You are partnered with
Stay on the line until you can tell the communicator where you are calling from. THEN you can hang up.
- Send an email notifying your supervisor that you transferred a call.

QUESTIONS?
