

MILWAUKEE HOMICIDE REVIEW COMMISSION

Join Us: Community Service Provider Homicide Reviews

Every other month community service providers from all fields come together to discuss homicide prevention and intervention strategies. Using what we know from recent homicides in Milwaukee, **we develop recommendations to improve the systems and programs that were designed to respond to and prevent violence — and then we work together to implement those recommendations.** Each year we grow more strategic in our approach, digging deeper to address the root causes of violence, increasing interagency coordination and communication, and creating spaces to celebrate what's working well. **These meetings help us all stay accountable to the safety and well-being of Milwaukee's residents.**

A typical meeting has three parts: an examination of solved homicides that took place in the past month, a discussion of possible prevention strategies and action steps, and a short update on our action steps.

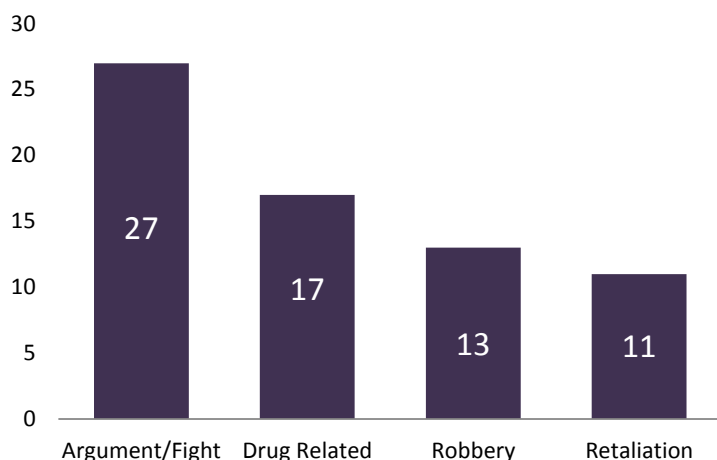

Number of 2013 Non-Fatal Shooting Victims

Who should attend?

Community providers, supervisors, frontline staff, Executive Directors or Deputy/Program Directors of nonprofit organizations that are addressing safety and violence as part of their organization's core work.

Primary Factors of the 2013 Homicides
