Wisconsin Department of Corrections

Reducing Opioid Overdose – Our Successes and Initiatives

Alisha Kraus and Michael Meulemans

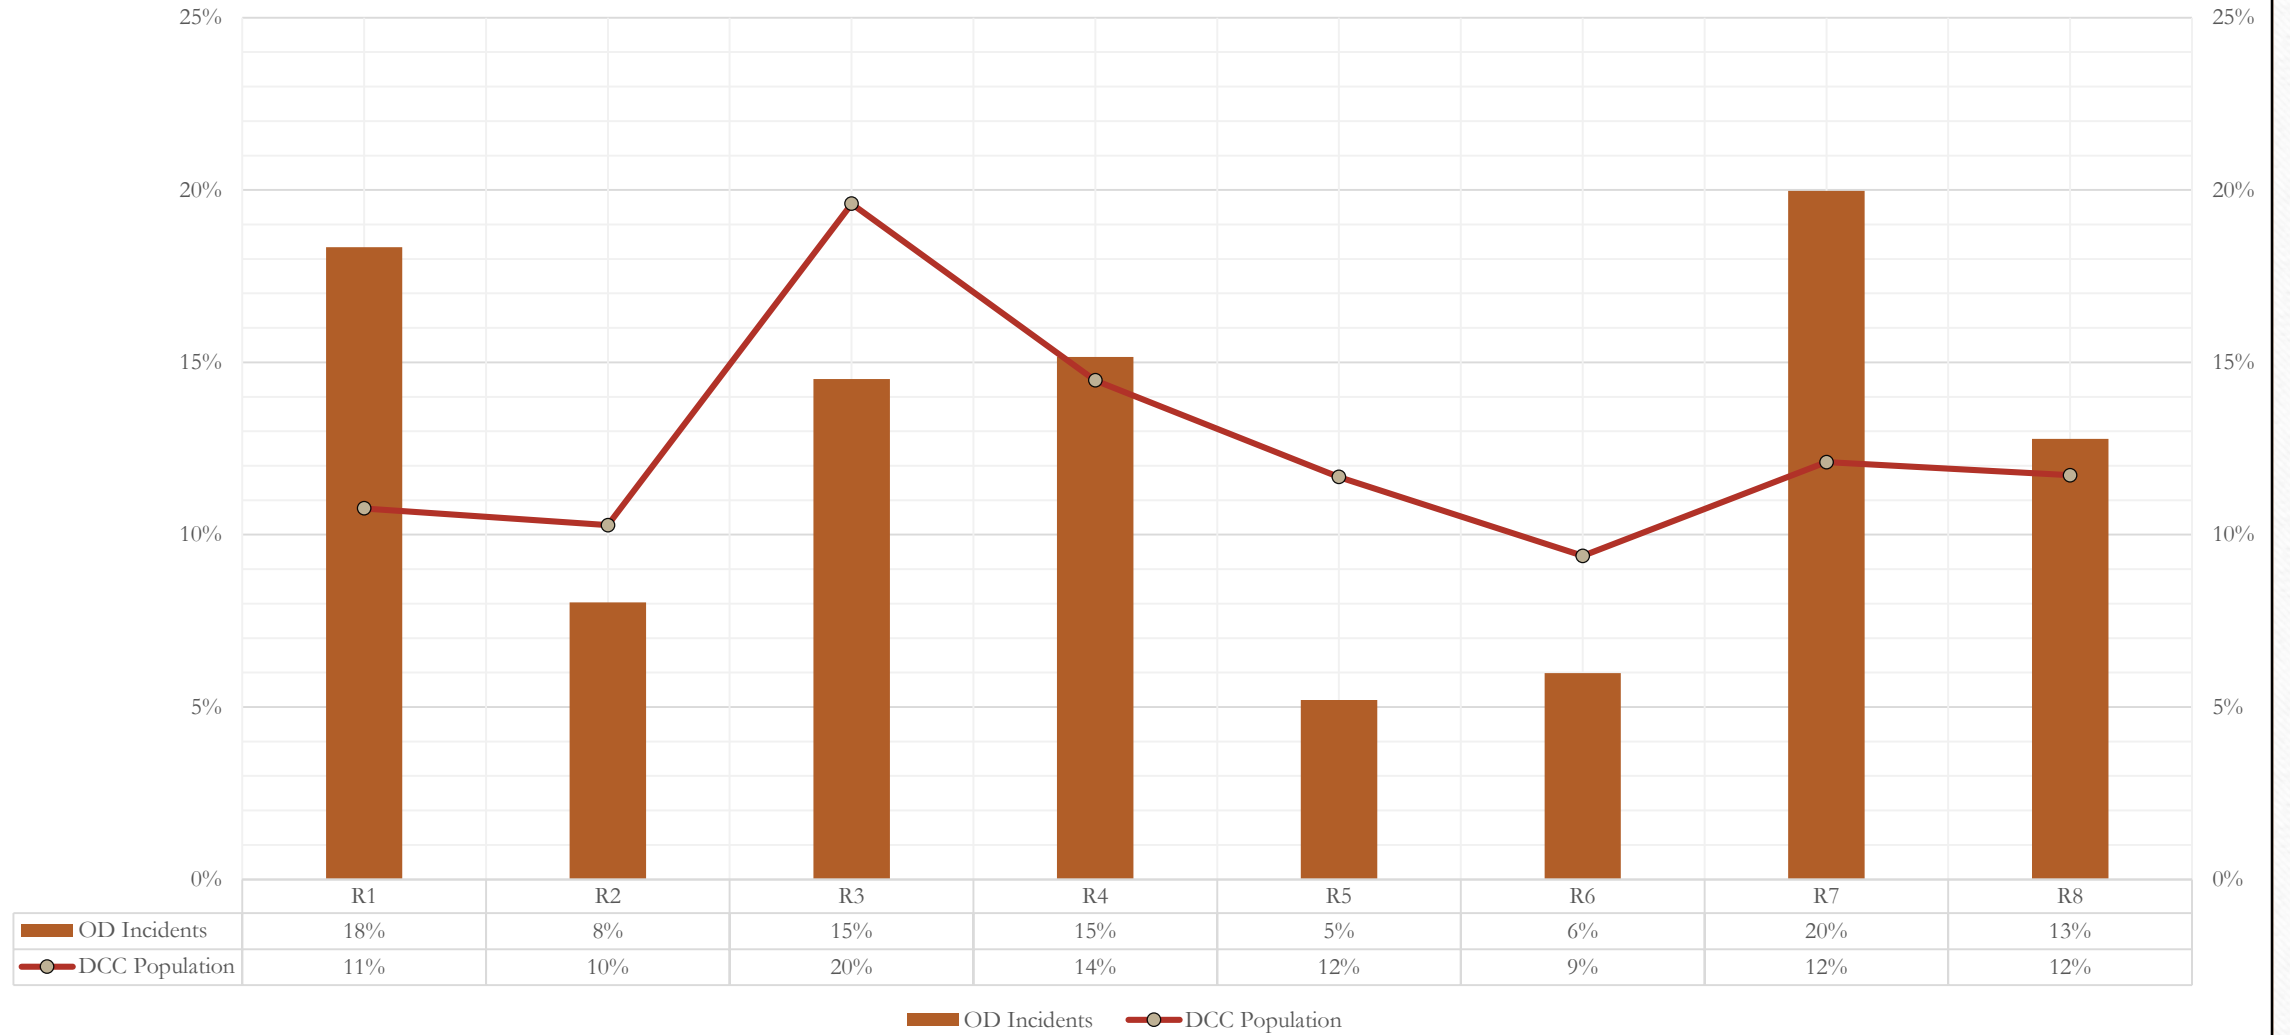

The path of our DOC Opioid Epidemic and our Data

“Nobody woke
up in the morning
and said, ‘I want to
be a heroin addict
because it sounds
super awesome.’”

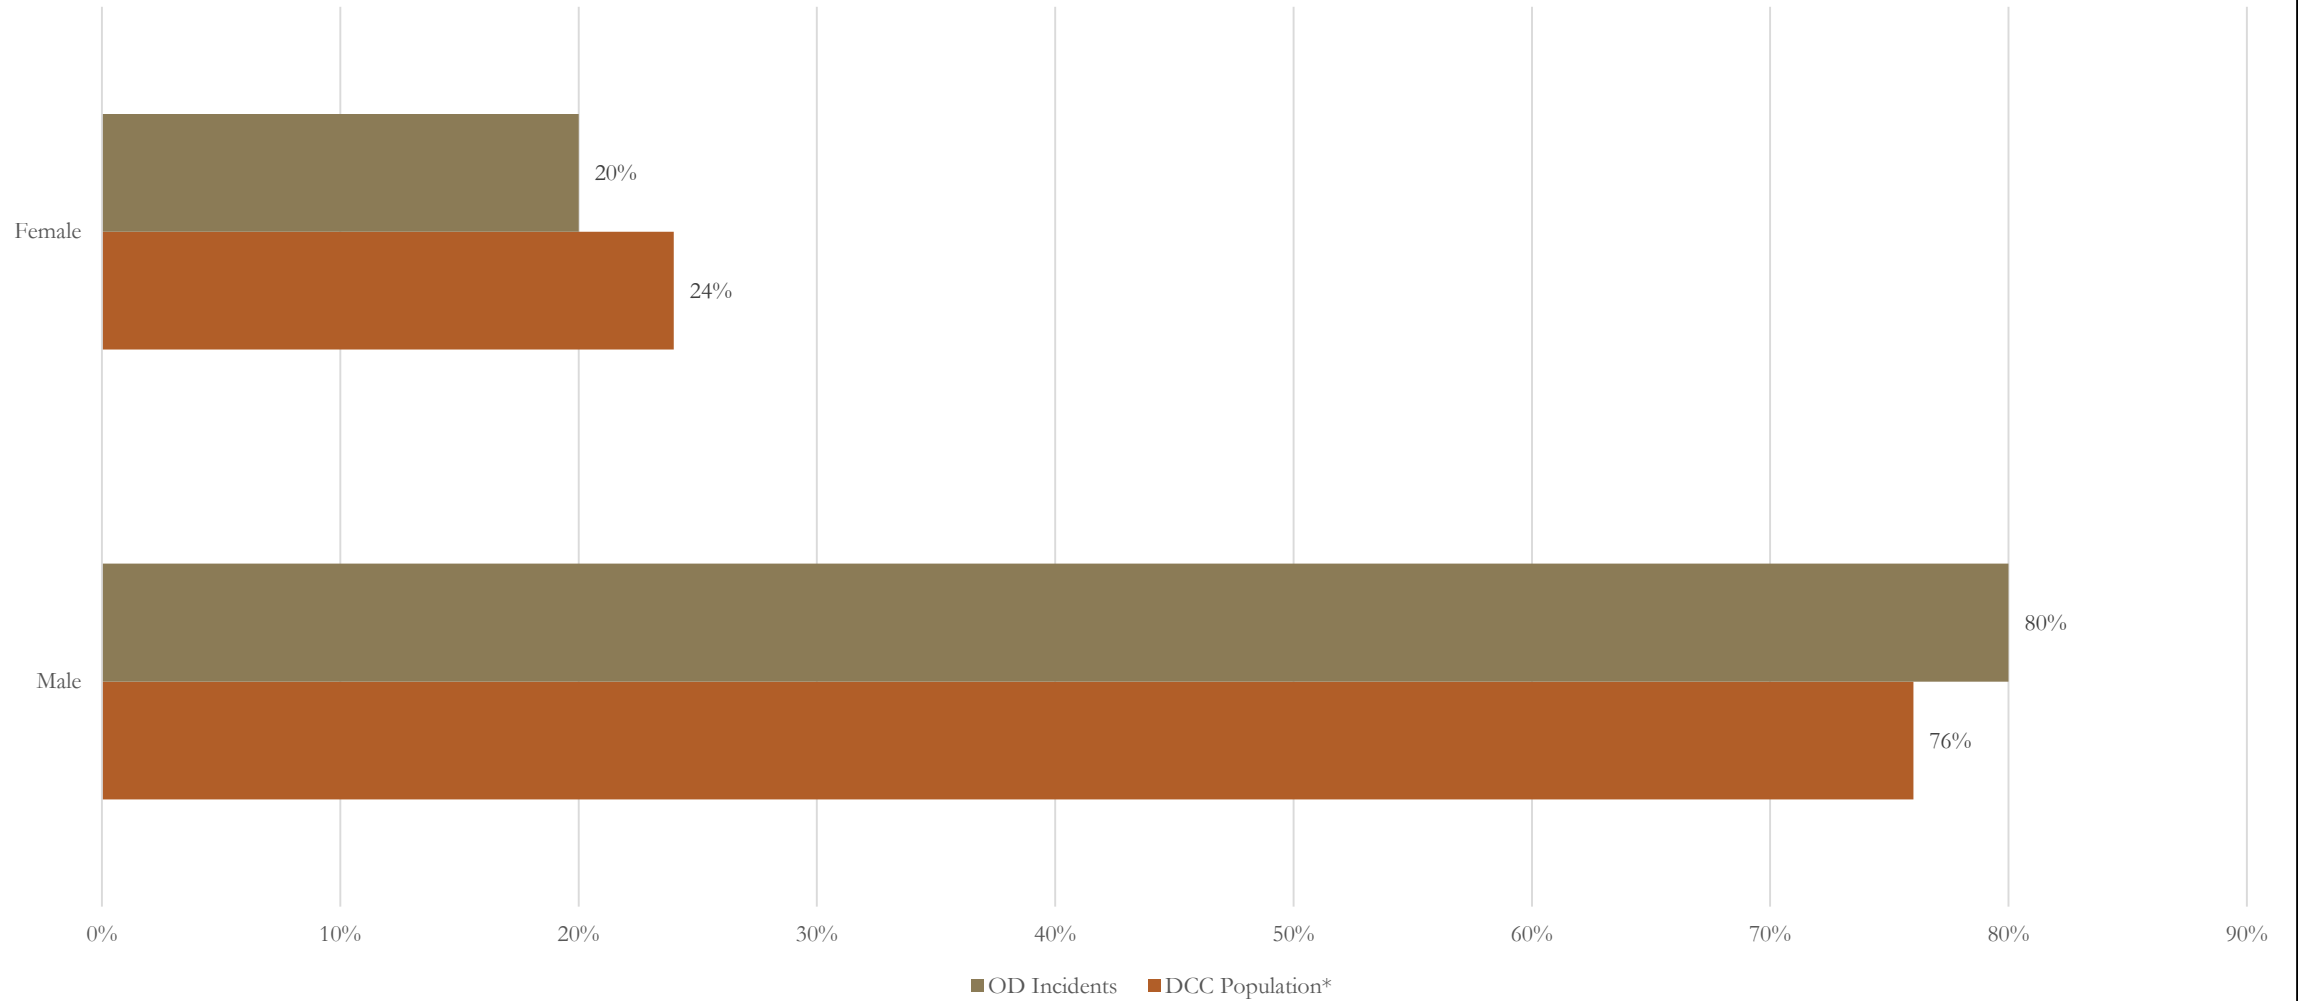

Incidents by Region

(All Overdose-related Situation Alerts, by Incident, not offender)

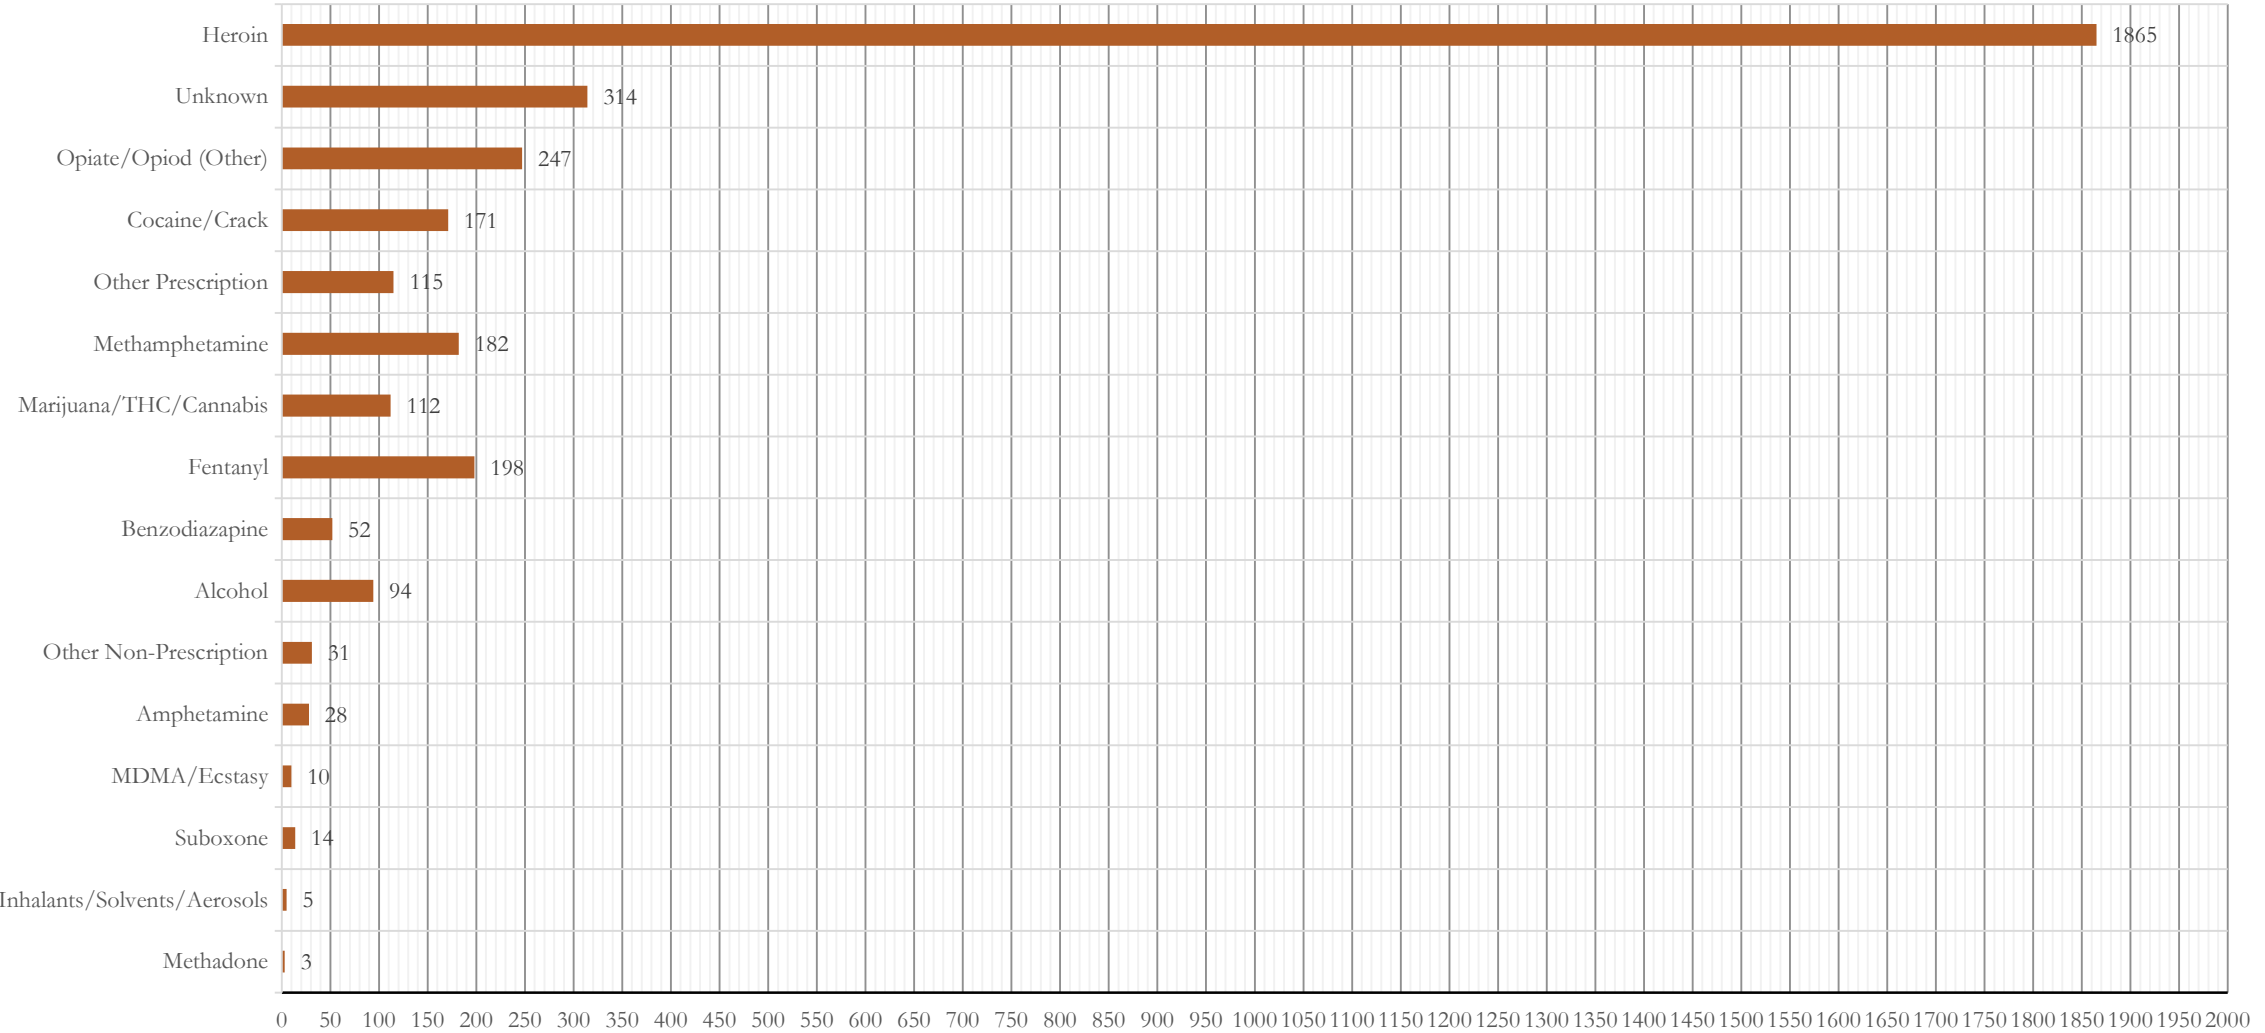

Gender

*(All Overdose-related Situation Alerts by Incident,
not offender)*

Overdose Substances

Notes: (1) Many instances involve more than one substance; (2) Many situation alerts did not report substances; (3) Only includes situation alerts where offender was the overdose victim.

Opioid Addiction Program

From DAI to DCC – A Journey of HOPE

DAI SUD Treatment Options

Current SUD Needs

As of 12/1/2020...

- DAI had roughly 23,100 individuals in our care
- 9,808 individuals in our care have an identified SUD need and are on the waitlist for treatment
- 823 individuals in our care are currently enrolled in SUD programming
- 450 individuals in our care are currently enrolled in Earned Release Programming
- 28 individuals in our care are currently enrolled in Challenge Incarceration Programming

Assessment

TAAD5 (Triage Assessment for Addictive Disorders - 5)

- Brief structured interview designed to identify current alcohol and drug problems
- Covers all DSM-5 criteria for substance use disorders
- Allows for a fast, initial discrimination between a likely substance use disorder and no diagnosis

COMPAS risk level identified by the COMPAS assessment tool

Individuals are assigned a SUD level based on a combination of their TAAD5 results on and their COMPAS risk level

SUD Level

SUD1

- Individual Case Plan Intervention with assigned Social Worker

SUD2

- Low dosage required
- Group and Individual treatment with SUD treatment staff

SUD3

- Moderate dosage required
- Group and Individual treatment with SUD treatment staff

SUD4

- Highest level of dosage required
- Group and Individual treatment with SUD treatment staff

Wisconsin Women's Correctional System Programming

SUD1 – Case plan
intervention with
general population
social worker/case
manager

SUD2 – Helping
Women Recover and
Connections (12
weeks)

SUD3 – Helping
Women Recover,
Connections, Moving
On, and Seeking
Safety (15 weeks)

SUD4 – Helping
Women Recover,
Connections, Moving
On, Seeking Safety,
and DBT Informed
Skills Group (17
weeks)

Men's System Programming

SUD1 – Case Plan
Intervention with
general population
social worker/case
manager

SUD2 – Cognitive
Behavioral Intervention
for Substance Abuse
(CBI-SA) (12 weeks)

SUD3 – CBI-SA and
Thinking for a Change
(T4C) (18-20 weeks)

SUD4 – CBI-SA, T4C,
and Epictetus with
General Skills plus
needed ancillaries (20
weeks)

- Domestic Violence
- Anger Management/Anger Control
- Advanced Practice

SUD Program Options

Earned Release Programming (ERP)

Earned Release Program is driven by statute and allows judges to sentence non-violent, non-assaultive individuals with a substance use disorder to this program.

Challenge Incarceration Program (CIP)

Challenge Incarceration Program is a statutorily established program that allows judges to sentence non-violent, non-assaultive individuals with substance abuse needs to this full-time intensive program that combines physical fitness and well-being with SUD treatment.

Non-ERP SUD treatment

Residential SUD treatment who are not ERP/CIP eligible.

DCC SUD Treatment Options

Residential

Assessment

Intensive
Outpatient

Outpatient

Aftercare

Medicated Assisted Treatment - DAI

Release Planning for SUD Program Participants

ERP/CIP participants release plan with their program provider (treatment specialist or social worker) and SUD residential participants continue to work with their general population social worker. The DCC Agent is also involved in the release planning process.

Education is provided on treatment and resource options.

Referrals are made for any treatment and/or programs the individual is interested in becoming involved in.

Appointments are scheduled and plans are made for first few weeks to months of release.

Opioid Use History Specific Release Planning

DAI and DCC work collaboratively with person in our care to determine best route for aftercare and/or ongoing treatment.

Medication Assisted Treatment options are reviewed, education materials are provided, and referrals are made.

Vivitrol injections are offered pre-release at several DAI sites if the person in our care voluntarily enrolls in the program.

Some sites that are not offering Vivitrol are offering Oral Naltrexone to persons in our care until they are able to be seen by a medical/treatment provider in the community.

DAI is hoping to expand the ability of sites to offer Vivitrol pre-release by bringing additional institutions on board.

Current DAI Vivitrol Sites:

Black River Correctional Center (BRCC)

Chippewa Valley Correctional Treatment Facility (CVCTF)

Drug Abuse Correctional Center (DACC)

Flambeau Correctional Center (FCC)

Fox Lake Correctional Institution (FLCI)

Kettle Moraine Correctional Institution (KMCI)

Milwaukee Women's Correctional Center (MWCC)

Oshkosh Correctional Institution (OSCI)

Racine Correctional Institution (RCI)

Robert E Ellsworth Correctional Center (REECC)

Red Granite Correctional Institution (RGCI)

Taycheedah Correctional Institution (TCI)

Winnebago Correctional Center (WCC)

DCC Release Planning Efforts

- Re-entry Phone call between Agent and DAI Social Worker begin at 6 months prior to release
- Date of Release to DCC
 - Build Agent/Client rapport
 - Transportation
 - Housing
 - Program Referrals

Current DCC Locations

Region Four

- Brown
- Door
- Calumet
- Outagamie
- Winnebago
- Kewaunee

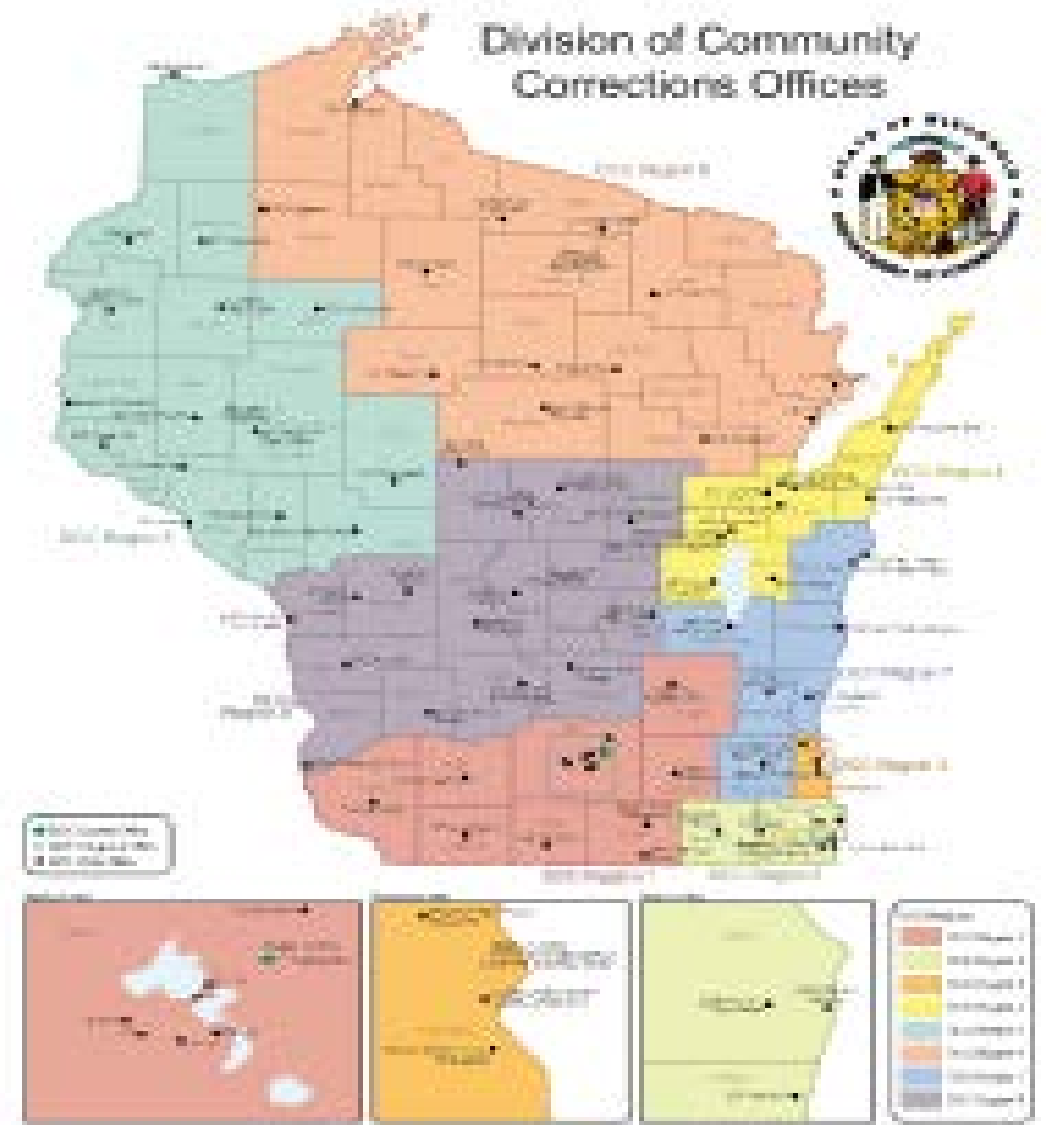

Region Seven

- Manitowoc
- Sheboygan
- Waukesha
- Washington
- Fond du Lac
- Ozaukee

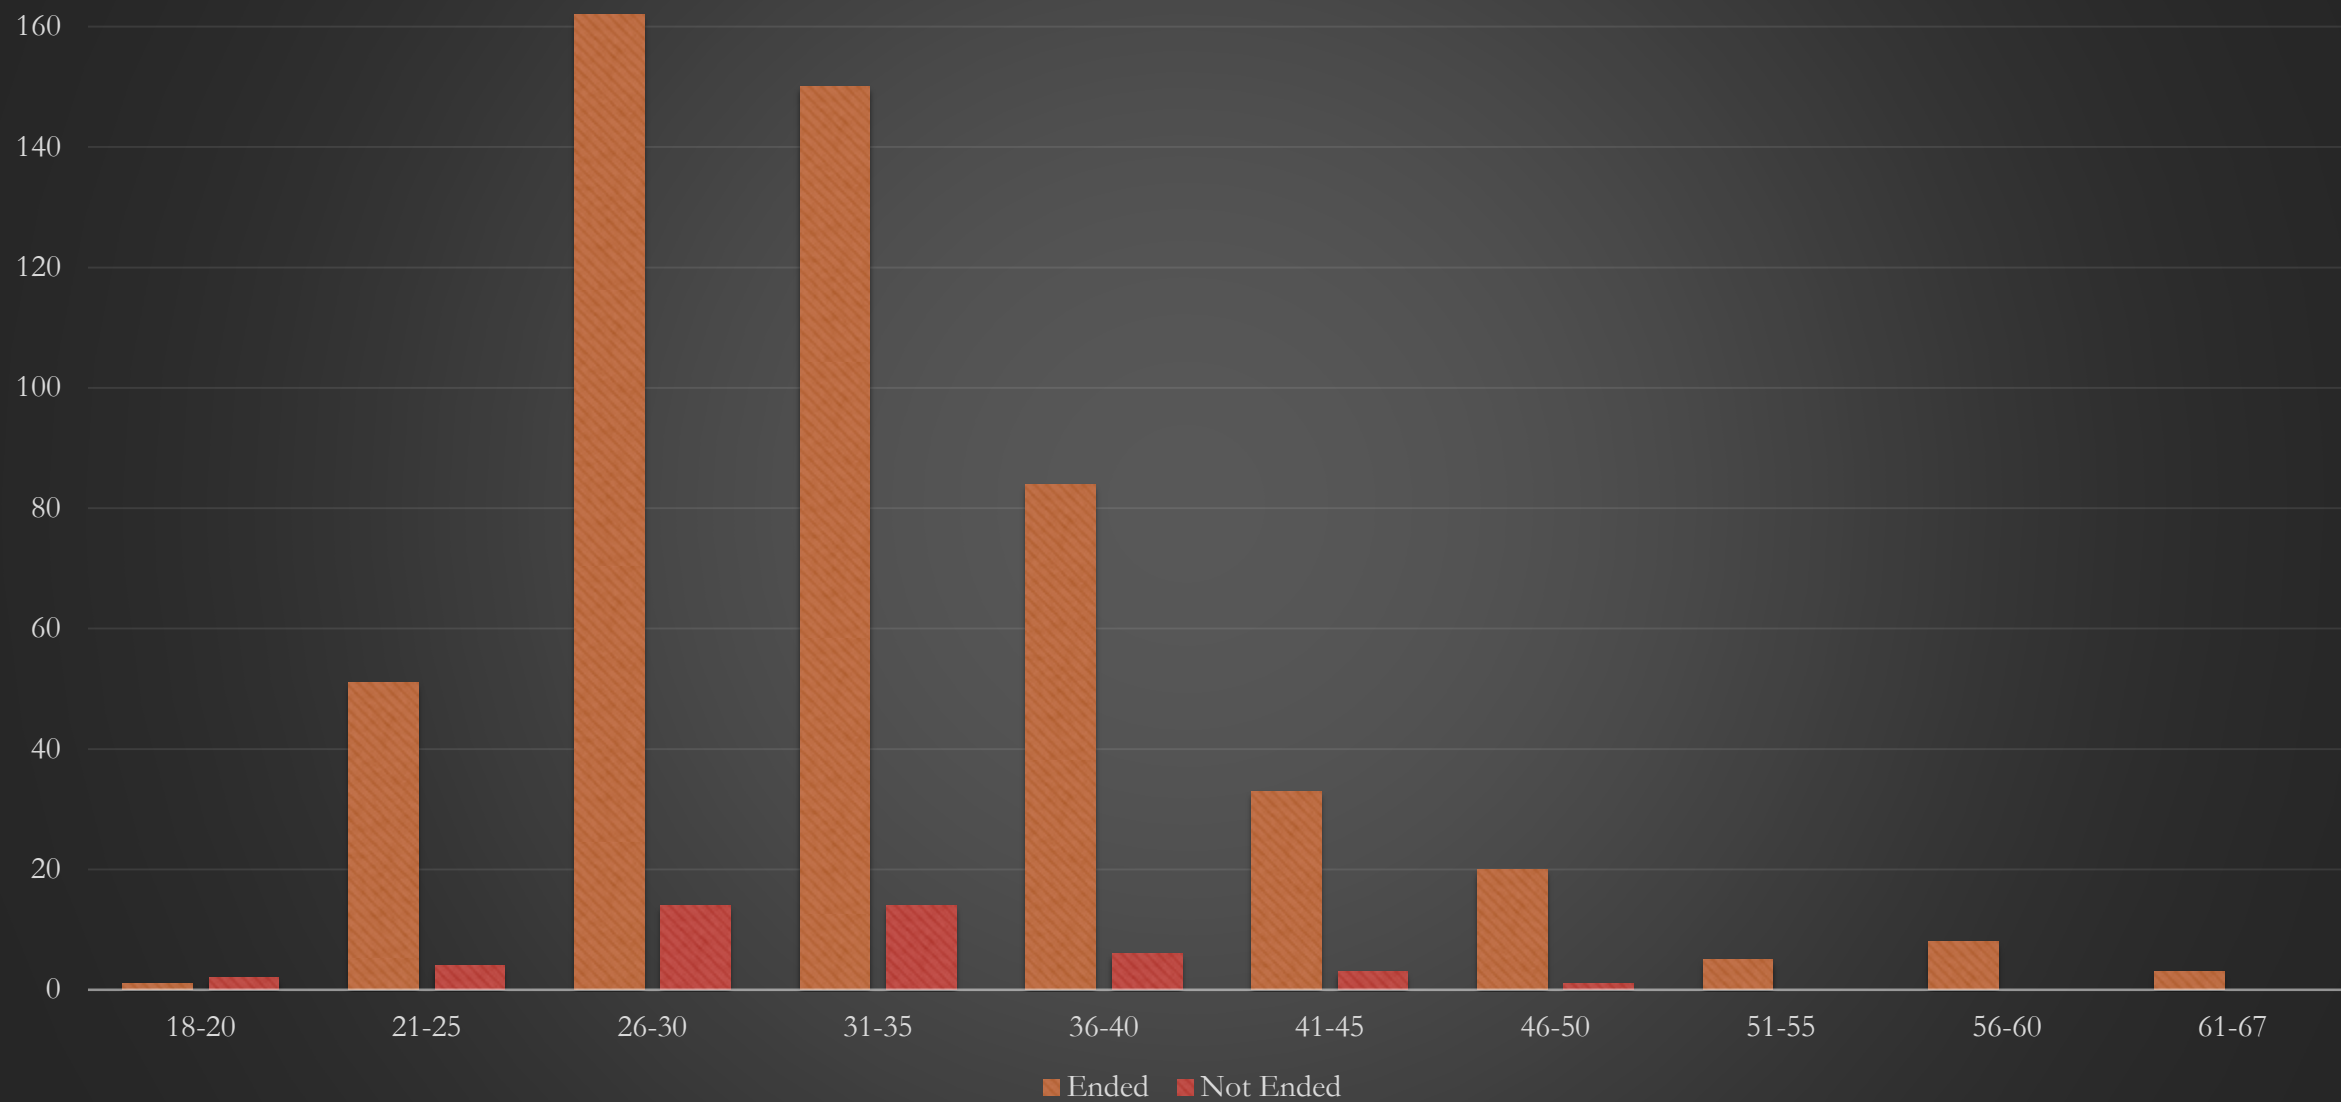

Region Eight

- Waupaca
