

FLEX, NHSR, Case Report, and QI Project Changes

FLEX, NHSR, Case Report, and QI projects are now required to complete a Progress Check-In equivalent to the existing process for Exempt projects. The progress check-in feature will be available under Activities on the left-hand navigation pane in an individual's workspace.

Existing Projects:

For existing projects, a prospective due date will be assigned based on the project's initial approval date.

New Projects:

For projects categorized as FLEX, NHSR, Case Report, and QI after the implementation of the Progress Check-in, a three-year period will be granted at the time of initial approval/acknowledgment. Once the initial approval period has ended, a "Progress Check-in" will be required on an annual basis.

Upcoming Deadlines

Jul 31 2026	FP000 Continuation Due, in 2 months
Aug 3 2026	PRO0004 Progress Check-in Required, in 2 months
Mar 9 2027	PRO0001769 Progress Check-in Required, in 9 months
Apr 2 2027	PRO000 Progress Check-in Required, in 10 months
Jun 1 2027	PRO00000615 Progress Check-in Required, in a year

This due date will appear in the Upcoming Deadlines section of the eBridge workspace. The Progress Check-in must be completed within one year to either close the project or keep it active for an additional year. If the Progress Check-in is not completed, the project will be automatically archived, and all research activities must cease. Projects that are archived cannot be reopened.
