

Postdoctoral Residency Admissions, Support, and Initial Placement Data

Date Program Tables are updated:

Program Disclosures

Does the program or institution require students, trainees, and/or staff (faculty) to comply with specific policies or practices related to the institution's affiliation or purpose? Such policies or practices may include, but are not limited to, admissions, hiring, retention policies, and/or requirements for completion that express mission and values?	<div><input type="checkbox"/> Yes</div> <div><input checked="" type="checkbox"/> No</div>
If yes, provide website link (or content from brochure) where this specific information is presented:	

Postdoctoral Program Admissions

Briefly describe in narrative form important information to assist potential applicants in assessing their likely fit with your program. This description must be consistent with the program's policies on intern selection and practicum and academic preparation requirements:

Applicants with a doctoral degree in professional psychology from an APA- or CPA-approved graduate program and an APA-approved internship are considered. The program assumes that a solid foundation of general clinical knowledge and skills has been established on entry into the program. Expected knowledge includes a generic psychology core and a generic clinical core. Obtained through course completion, it is also expected that residents arrive with an intermediate knowledge of brain-behavior relationships and neuropsychological assessment techniques.

Acquired through practica training preferably with supervision by ABPP-CN board-certified supervisors, expected skills on entry include general neuropsychological assessment skills, general treatment and interventions skills, and effective basic communication and consultation skills. Basic research skills as demonstrated by dissertation completion (identification of research questions, review of relevant literature, design of research, execution of research, monitoring of progress, evaluation of outcome, communication of results) are required. It is also expected that residents will arrive with skills in teaching and supervision. Generally, only applicants who completed an internship that was at least 50% neuropsychological training are considered.

Describe any other required minimum criteria used to screen applicants:

- Reference letters including student's experiences and abilities.
- Candidate transcripts detailing completed coursework and training.
- An interview, either in-person or via Zoom, assessing a potential "fit" between candidate and intern program.

Financial and Other Benefit Support for Upcoming Training Year*

Annual Stipend/Salary for Full-time Residents	\$61,428	
Annual Stipend/Salary for Half-time Residents	N/A	
Program provides access to medical insurance for resident?	X Yes	No
If access to medical insurance is provided:
