

knowledge changing life

The Division of Neuropsychology in the Department of Neurology at the Medical College of Wisconsin is recruiting for our two-year postdoctoral fellowship program in clinical neuropsychology. We offer postdoctoral fellowships in both adult and child neuropsychology to graduates of APA/CPA accredited doctoral psychology programs who have completed APA/CPA accredited internships. Our postdoctoral training program is a member of the Association of Postdoctoral Programs in Clinical Neuropsychology (APPCN; *The Clinical Neuropsychologist*, 1993, 7, 197-204) and adheres to the Houston Conference standards and model (*Archives of Clinical Neuropsychology*, 1998, 13, 160-166) for specialty training in clinical neuropsychology. Our program is accredited by the American Psychological Association's Committee on Accreditation in the specialty of Clinical Neuropsychology.

We currently anticipate recruiting TWO pediatric and TWO adult fellows for positions beginning in July of 2019. One adult fellow who has interest or background in traumatic brain injury (TBI) research will be awarded additional protected research time to conduct TBI research in the lab of Drs. Michael McCrea and Lindsay Nelson.

The anticipated stipend for the position is \$47,476 (\$47,976 for second year), which is subject to budgetary approval. Additional benefits include a full complement of health, dental, and malpractice insurance, annual vacation, professional leave, sick leave, and an annual business account of \$500. See the Neuropsychology Residency Brochure for a more detailed description of our program. You can learn more about our program from the APPCN website (www.appcn.org) and MCW and the Department of Neurology at: <http://www.mcw.edu/neurology/divisions/neuropsych.htm>.

MCW is an Affirmative Action/Equal Opportunity Employer, and we encourage applicants to identify their minority status so that AA/EOE policies can be made fully operational.

To apply to our fellowship program, please submit a personal statement including your preference for the Adult or Child track, curriculum vitae, and two samples of your clinical reports electronically as **one** PDF file to [MCW Neuropsych Postdoc@mcw.edu](mailto:MCW_Neuropsych_Postdoc@mcw.edu). Also, please, have graduate transcripts sent electronically, and have three letters of recommendation emailed directly from the recommender to [MCW Neuropsych Postdoc@mcw.edu](mailto:MCW_Neuropsych_Postdoc@mcw.edu). If you are unable to have transcripts sent electronically, have your institution mail directly to the program at the address below.

If you have not completed your dissertation, please arrange for a letter or statement of verification (<http://www.appcn.org/doctoral-training-verification>) from your dissertation committee chair indicating the expected completion of the oral defense prior to July 1, 2019. The formal deadline for application is January 4, 2019. Our program is participating in the National Match Program for residencies in clinical neuropsychology, a program that is essentially identical to that used for internship programs. Thus, in addition to submitting application materials to our program, you will need to register with National Matching Services (Phone: 416-977-3431; Fax: 416-977-5020; www.natmatch.com). Interviews can be arranged by skype, on site, or at the INS Convention in Washington, D.C. Space will be made available at the INS Convention Hotel for interviews on Tuesday, February 12, 2019.

By having an "Interview Day" prior to the start of the Convention, it is thought that both candidates and program directors would then be free to enjoy the Convention. The deadline for applicant rank order lists is February 26, 2019 and the Match notification will take place March 4, 2019. Thank you again for your interest. Please contact us at MCW_Neuropsych_Postdoc@mcw.edu if you have any questions.
