Alexion (NASDAQ: ALXN) is a global biopharmaceutical company focused on serving patients and families affected by rare diseases through the discovery, development and commercialization of life-changing therapies. Since its founding in 1992, Alexion has given hope to people who had none and shined a light on those who felt isolated and alone. Alexion has developed and delivered therapies for the treatment of complement-mediated diseases – two for patients with paroxysmal nocturnal hemoglobinuria (PNH) and one for patients with atypical hemolytic uremic syndrome (aHUS), anti-aquaporin-4 (AQP4) antibody positive neuromyelitis optica spectrum disorder (NMOSD), and anti-acetylcholine receptor (AchR) antibody-positive generalized myasthenia gravis (gMG). See www.Alexion.com for more information.

Bristol-Myers Squibb is a global biopharmaceutical company focused on discovering, developing and delivering innovative medicines for patients with serious diseases. We are focused on helping patients in disease areas including oncology, cardiovascular, immunoscience and fibrosis. Each day, our employees work together for patients - it drives everything we do.

In the early 2000’s The Medical College of Wisconsin (MCW) became the pioneer in clinical genomics and molecular pathology. Since then MCW has grown its services into the Genomic Sciences and Precision Medicine Center (GSPMC) in order to continue to lead in this arena and deliver our clinical partners the ability to practice precision medicine. Our robust offering of clinically validated genomic and molecular assays along with our comprehensive bioinformatics services allows us to provide a full suite of services at the highest of level of quality.

The Medical College of Wisconsin Department of Pathology is dedicated to delivering state of the art, subspecialty laboratory diagnostics to our patients; providing comprehensive and practical pathology training; building a strong foundation for our medical students; advancing medical knowledge regarding the understanding, diagnosis, and treatment of human disease; serving our community; and developing leaders.

For more than a century, Merck has been inventing for life, bringing forward medicines and vaccines for many of the world’s most challenging diseases. Today, Merck continues to be at the forefront of research to deliver innovative health solutions and advance the prevention and treatment of diseases that threaten people and animals around the world.

Nikon Instruments features the Eclipse Ci-L LED microscope with world renowned CFI60 optics, advanced ergonomics, exceptional brightness and unsurpassed clarity for demanding slide examination. The Digital Sight camera system captures Ultra High Resolution images, and provides live and remote viewing for teaching and consultation. New LED Fluorescence increases productivity and reduces costs.
At **Olympus**, we are dedicated to your work, your vision – your science. Our wide range of imaging solutions are built with the optical excellence and proven application expertise you have come to expect and depend on. Let us be your partner in discovery. Stop by our booth or visit [www.olympus-lifescience.com](http://www.olympus-lifescience.com).

At **Sakura Finetek**, we are committed to advancing cancer diagnostics by providing integrated solutions for anatomic pathology and patients through best-in-class innovation, quality and customer care.

We have become a name trusted and respected group by customers in hospitals and laboratories worldwide and globally provide smartly automated histopathology systems and services. From grossing to slide imaging and every step in between, we are leading the industry in product quality and reliability.

**Success Concepts Medical Books** is an independent retailer of medical books with over 20 of experience. We sell books published by Elsevier and McGraw-Hill.

**Vector Surgical** is the global leader in tissue orientation devices that provide the most accurate designation of excised tissue margins in cancer surgery. Our devices integrate the needs of surgeons, pathologists and radiologists, providing tools that enable the highest level of care for their cancer patients. Leading hospitals and physicians are eliminating error and improving outcomes with our products: MarginMakers® sterile ink kits, CorrectClips® radiographic clips and the SilversteinWrap™.

**Wisconsin Diagnostic Laboratories (WDL)** specializes in delivering comprehensive, clinical laboratory services to a variety of clients from large tertiary care centers to small community practices and acts as a reference laboratory to a number of hospitals throughout Wisconsin and northern Illinois. With more than 600 employees, WDL has the depth, experience and resources to provide exceptional quality laboratory services. Our unique affiliation with the Medical College of Wisconsin Department of Pathology affords our clients and patients access to a unique blend of highly skilled pathologists and PhD scientists for consultations and professional expertise.

We perform over 5 million tests annually. Our large, multi-disciplinary laboratory offers an extensive and comprehensive test menu that ensures virtually all testing is performed locally. WDL offers onsite testing for Anatomic Pathology, Cytogenetics, Cytology, Chemistry, Flow Cytometry, Hematology, Microbiology, Molecular Genetic Profiling and Long Term Care, providing expert academic care in every pathology sub-specialty.
