

RECRUITING

Pediatric Endocrinology Fellowship

Our clinical practice follows over 2,000 youth with diabetes and has consistently been ranked by US News and World Report as one of the best. Our researchers are at the front of cutting-edge laboratory and clinical research that is funded by NIH, ADA, JDRF and other sources. Our Quality Improvement efforts are led by faculty who participate in national QI training programs.

AS A FELLOW, YOU WILL:

- Gain experience treating children with common and rare endocrinopathies due to large referral area
- Learn from attending physicians who trained across the world
- Establish a strong continuity clinic while increasing autonomy
- Work with other subspecialists in multidisciplinary clinics

CLINICAL EXPERIENCE

From the start of fellowship, fellows have their own Diabetes and Endocrinology continuity clinics, which allow them to build relationships with families and learn more about the pathophysiology and progression of various diseases including Diabetes Type 1 & 2, puberty, and growth disorders. Fellows participate in a variety of specialized clinics. Inpatient experience at CHW allows fellows to build expertise in evaluation and management of endocrine and diabetes mellitus issues while patients are acutely ill or post-surgical following a recent procedure.

RESEARCH EXPERIENCE

Fellows have full access to the active and thriving McGee Diabetes Research Center, a multi-disciplinary Type 1 diabetes research center engaged in basic, translational, and clinical research. There are ample opportunities to participate in bench and animal work and also to translate those findings to clinical research protocols. Past fellows have been active leaders on interventional clinical trials, presented at national meetings, and received authorship in peer-reviewed articles.

ACADEMIC CURRICULUM

We have a robust educational conference curriculum. We do a variety of diabetes and endocrine journal clubs, case conferences, morbidity and mortality (M&M) cases, guest speakers from other clinical areas, and we review board preparation questions during team sessions.

"My time as a fellow exposed me to all forms of diabetes along with a broad array of endocrinopathies in both the inpatient and outpatient setting. During my third year, outside physician referral calls were routed to me with attending supervision providing much needed experience in this form of triage. I joined the faculty following my training and the transition to an attending was seamless due to the training I received." ~ GRADUATED FELLOW

Program Director(s)

MEDICAL COLLEGE OF WISCONSIN | MCW.EDU

MCW offers medical, master's, doctorates, master of public health and master of art degrees. MCW has approximately 1,600 full-time and part-time faculty and approximately 3,445 full-time employees, making it one of the largest healthcare employers in Wisconsin. MCW works with national and international medical specialty societies and community hospitals to accredit approximately 200 continuing medical education activities annually for physicians and other health professionals.

CHILDREN'S HOSPITAL OF WISCONSIN | CHW.ORG

A 306-bed freestanding hospital dedicated solely to the care of children, Children's is one of the top ranked pediatric hospitals in the country. It offers a Level I Trauma Center, a Level I surgery center, a Level IV neonatal intensive care unit and a 72-bed pediatric intensive care unit. It is the primary pediatric hospital for all of the children of Southeast Wisconsin and the main referral center for children living in much of Wisconsin and northern Illinois. The hospital also receives patients from across the country and around the world for specific subspecialty care.

CHILDREN'S RESEARCH INSTITUTE | CHW.ORG/RESEARCH

With more than 1,000 active clinical trials and nearly \$25 million in external funding, the work done at Children's Research Institute yields new diagnostic tools, treatments, preventions and cures for many childhood illnesses. The Research Institute brings together researchers and clinicians from multiple disciplines throughout southeastern Wisconsin, including life sciences, medicine, psychology, nursing, engineering and epidemiology to investigate and bring research to bear on clinical practice.

CHILDREN'S SPECIALTY GROUP

Children's Specialty Group is the pediatric specialty group established in 2000 as a joint venture between Children's and MCW. Children's Specialty Group includes more than 360 pediatric specialists, 130 pediatric advanced practice nurses and 40 physician assistants. All physicians have faculty appointments with MCW.

MILWAUKEE | MILWAUKEE.ORG

Milwaukee has all the advantages of a large, vibrant city without the stress or cost. The largest city in Wisconsin, Milwaukee has affordable housing, excellent public and parochial schools and minimal traffic. Neighborhoods are known for their variety and character. The local business community is strong in manufacturing, technology and service industries. Milwaukee is located in the southeast corner of Wisconsin, nestled along one of Lake Michigan's beautiful bays.

We are an Equal Opportunity/Affirmative Action Employer.
