**Web:** N/A

## Overview

The Core consists of an irradiator that can be used to irradiate live animals, particularly mice and rats. One can also irradiate cells in culture using this instrument. Access to the irradiator requires training and approval by MCW radiation safety. Instrument-specific training will be conducted by the facility director, Dr. L. William Cashdollar.

**Hours:** available during hours that the TBRC is open

**Common users of the facility:** available to MCW investigators

**Rate:** no charge for use
