

Are individuals assigned specific interventions (diagnostic, therapeutic, behavioral or other types) by the principal investigator for the purpose of assessing biomedical and/or health outcomes?

Clinical Research Category
INTERVENTIONAL

What is the PRIMARY PURPOSE of this Intervention?

Treat the disease, syndrome or condition

TREATMENT

Prevent the development of a specific disease or health condition

PREVENTION

Maximize comfort, minimize side effects, or mitigate against a decline in health or function

SUPPORTIVE

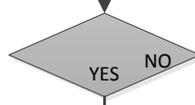

Examine methods to identify condition (or risk factor for a condition) in people who are not yet known to have the condition (or risk factor)

SCREENING

Identify a disease or health condition

DIAGNOSTIC

Is this a laboratory-based study using specimens to assess cancer risk, clinical outcomes, response to therapy OR a study that is linked to an active clinical research study and should only include patients accrued to that clinical research study?

Clinical Research Category
ANCILLARY/CORRELATIVE

Prospective study associated with an active clinical trial and only includes patients or participants accrued to that trial?

OTHER (OTH)

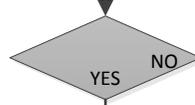

Laboratory study using specimens linked to patients to assess cancer risk, clinical outcomes, response to therapies, other?

BASIC SCIENCE (BAS)

A Tissue Banking study or does it represent archived tissue studies?

NOT APPLICABLE (NA)

Is this a study using focusing on cancer patients and healthy populations that involves no prospective interventions or alterations in the status of the participant?

Clinical Research Category
OBSERVATIONAL

Clinical Research Category
NOT APPLICABLE

Study involves observation, surveillance or outcomes evaluation of healthy populations and/or cancer patients?

OTHER (OTH)

Study designed to evaluate the delivery, management, organization, or financing of health care?

HEALTH SERVICES RESEARCH (HSR)

Retrospective chart review/database or prospective database (with no research objectives?)

NOT APPLICABLE (NA)

Expanded Access, Treatment Use, Non-Cancer subjects

TREATMENT
