Fall 2020	11	9	2	0	0	0	0
Total	84	73	37	3	2	9	2

Notes:

The next destination data is from the National Student Clearinghouse. While most institutions in the U.S. use NSC, not all do. Therefore, subsequent enrollment for some students may not appear in the report, despite the fact they enrolled elsewhere after completion of the MMP at MCW.

The data provided by NSC is only as good as the data provided to them by institutions. Different schools provide different levels of detail. Some schools provided major areas, like Medicine or Dental Surgery, others did not. When an educated categorization could not be made, students were put into the Unknown Grad Program category.

This report was pulled 2/9/2022. Finding only two 2020 cohort students were at another institution leads me to believe that NSC has not received complete reporting of fall 2021 enrollment. Consider the fall 2020 cohort data preliminary.

Some students went to more than one institution/program after the MMP program. Students are counted one time in each category, but counted in multiple categories, if applicable. Therefore, we cannot add up the columns to get an accurate "number of students who went on to another program" based on this table.

Data from National Student Clearinghouse and MCW's Banner Student Information System
 Report created by Dr. Maureen Pylman, Director of Accreditation and Institutional Effectiveness
