#### **NEW: ACADICUS VIRTUAL REALITY**

A new project for the OEI team is the addition of the Acadicus Virtual Reality platform. This technology makes use of

- Oculus Rift S/ HP Reverb 2 VR Headsets
- Dell, HP and Lenovo laptops equipped with Nvidia Graphic Processors and Display Port inputs
- The Acadicus VR Platform by Arch Virtual for Medical Education

At the present time, the project is working with pre-set VR scenes through the Acadicus VR pro space. The VR platform offers students a space to practice working with patients and practice workflow for medical procedures in the early stages of education.

Interested? Please contact OEI to schedule an appointment for a demo/trial. Demos are done on campus, by request, during regular business hours.
