Mentoring Minute: Welcome New and Returning Advisors!

All M1 students have found advisors—Thank you for taking on this important responsibility!

Across the Pathways’ 550 participating students, we have 258 individual faculty members across 27 departments serving as Pathway Advisors. Of these, 55 faculty are new to this role.

Our Pathway Advisors serve a critical resources to the Pathway courses as they:
- Guide the student in development and execution of an individualized learning plan (ILP)
- Direct the student to appropriate resources and learning opportunities
- Monitor student progress toward meeting the ILP goals
- Provide a Midterm and End-of-Year performance assessment through Oasis - which contributes to the student's grade

NOTE TO M1 ADVISORS—the Midterm Assessment is ready now!
Please meet with your M1 students to review their progress, provide feedback/direction, and complete the assessment in Oasis. Your comments are very important to us!

Many Pathway Advisors also serve as the student’s Scholarly Project Mentor. Project Mentors oversee the student’s project plan and execution, ensure regulatory requirements (e.g., IRB) are met, and provide instruction, resources and feedback to help the student complete the required scholarly project by the end of their M3 year.

For more information on the Scholarly Pathways requirements and the roles of Mentors and Advisors, please see our Scholarly Pathways Handbook or contact one of our coordinators.

Student Stars

KUDOs to students and mentors!
