MCW Career in Medicine (CiM) - Four Year Program

M1 Career Self-Assessment

- Clarifying personal interests, abilities and values relating to potential specialties
- Exploring preferred work environment, practice characteristics and clinical apprenticeship experience
- Career Day: Learning AAMC CiM assessment tools, exploring various specialties and developing career plan
- Interpersonal and professional skills development

M2 Career Exploration

- Information gathering regarding career options (e.g., specialties and subspecialties, academic medicine, public health and other medical careers)
- Exploring career options via courses, clinical rotation, research, volunteer, summer experiences, post-match panel, etc.
- Clinical apprenticeship experience
- Elective Day: Learning different specialties and elective decision making, information interview with faculty, physicians and residents by different specialty

M3 Career Advising/Decision Making

- Advising and support for career decision making via referrals to clinical advisors in area(s) of interest and post-match panel
- Career Development Program: Learn AAMC CiM residency program resources and developing CV/personal statement
- Residency Days: Learn the process of residency application (i.e., clinical advisor program, away electives, ERAS, etc.)
- Continued professional skills development with clinical focus

M4 Career Search Preparation

- Obtaining letters of recommendation
- Career development programs: Application materials and interview skills
- Mock interviews: Receives feedback and improves interview skills
- Evaluating or alternating M4 elective experiences to prepare for specific residency training programs
