

Introducing ExamSoft

What is ExamSoft?

ExamSoft – an electronic exam testing. It comes in three modules:

1. **SofTeach** – Allows Course Directors and Coordinators to build and store exam questions.
2. **SofTest** – Students use to take the exam.
3. **SoftScore** – Educational Services use to complete exam scoring.

What Can ExamSoft Do?

- Scrambles exam questions and/or answers
- Blocks students from accessing other programs while taking their exam
- Provides instant exam results
- Identifies at-risk students and individual strengths and weaknesses
- Generates custom reports for faculty
- Replicates USMLE format

ExamSoft Status Update:

ExamSoft is replacing the ANGEL assessment function.

ExamSoft is scheduled to roll out in the 2013-2014 academic year.
