

Introducing MedBiquitous Terms

What are MedBiquitous Terms?

MedBiquitous Terms are

- a **standard** set of key terms governed by the AAMC
- used to classify instruction, assessment, and resource types used in medical and healthcare education along with
- data reported yearly back to AAMC.

These terms are used in OASIS and to prepare Course Design documents.

Categories:

There are three categories for terms:

1. Instructional Methods (how you plan to teach)
2. Assessment Methods (how you test)
3. Resources Types (methods like ARS, use of mannequins or videos that supplement instruction)

Why Use MedBiquitous Terms?

- Provide a data structure that represents health profession curriculum in a standard format
- Enable collection of curriculum data across education
- Exchange best practices with other medical schools and accreditation bodies
