

American Cancer Society- Center for Innovation in Cancer Research Training

Post-Baccalaureate Research Training Program

Do you have a passion for learning? Want to develop strong research and communication skills? Interested in a future in the biomedical field?

The ACS-sponsored **2-year post-baccalaureate program** will provide a scientific and career development foundation to fellows as they prepare for graduate or health professional school. Participants will receive an intensive research experience coupled with accessibility to world-class mentors at the Medical College of Wisconsin.

Program Benefits

- Participate in mentored cancer research activities
- Access to an experienced faculty from various fields
- Skill development including scientific writing/communications
- Networking at local, regional, and national meetings
- Career development support from MCW Career Services
- GRE and MCAT preparation
- Mentors that will guide you throughout the program

Deadlines

- Apply by May 1st, 2026, to begin in July, 2026

Eligibility

- Obtained a Bachelor's Degree by June 30, 2026
