

# Endocrine Grand Rounds

## Special Session

### *“Age and Sex-specific differences in Acromegaly”*

#### **JOIN US!**

**Thursday July 29, 2021  
4:00-5:00 PM**

**Webex # 120 691 5594**

**Password: CMEgrandrounds**

#### **Objectives:**

- ⇒ *Learn about the impact of age and sex on clinical presentation and comorbidities in acromegaly*
- ⇒ *Understand sex differences regarding biochemical and radiological characteristics*
- ⇒ *Learn about the influence of age and sex on response to treatment of GH-secreting tumors*

Adriana Ioachimescu, MD, PhD is a Professor of Medicine and Neurosurgery at Emory University where she co-directs the Emory Pituitary Center. Dr. Ioachimescu is a well known pituitary expert and participated all recent Cushing's disease and acromegaly consensus meetings. Dr. Ioachimescu is an author of many original and research peer-reviewed articles. Her current interests consist of understanding the influence of gender and race on pituitary tumors, validation of predicting factors regarding treatments for functioning pituitary adenomas and understanding of long-term neurocognitive and emotional effects of pituitary hormone alterations. Dr. Ioachimescu is the current chair elect of the Program Committee of the American Association of Clinical Endocrinology and the consulting editor of the Endocrine Clinics of North America.
