Jean Starr, MD, FACS, DFSVS, is Professor of Clinical Surgery in the Division of Vascular Diseases and Surgery at The Ohio State University Medical Center. Dr. Starr earned her undergraduate and medical degree from The Ohio State University. She completed a general surgery residency and a vascular surgery fellowship at the Cleveland Clinic. Dr. Starr also currently works part-time as the Medical Safety Officer for Medtronic's Aortic and Peripheral/Endovenous Operating Units for almost two years.

Dr. Starr's specialty interests are vascular and endovascular surgery. She has specific interests in carotid surgery and stenting and intervention for peripheral arterial disease, as well as complicated aneurysm repair. Her research focuses on endovascular trials and clinical outcomes studies. Dr. Starr is an active member of the Society for Vascular Surgery and has served on many committees. She is Past President of the Midwestern Vascular Surgical Society and served as the secretary for three years. She acts as a mentor for high school and medical students, as well as residents and fellows, and has a keen interest in promoting women in the vascular surgical field.
