* Programs listed are point of entry degree programs. Joint Degree Program data available via the partner school that administers the program.

** Students can remain inactive for three consecutive semesters and remain an enrolled student. If the student does not enroll following the third inactive semester, the student forfeits enrolled status and is administratively withdrawn. For purposes of this report, inactive students are listed as 'currently enrolled' as they are still considered active in the program.

*** Statistics under the '# Earned Master's Degree' for all PhD programs indicate the student had matriculated as a PhD student. Due to various circumstances, the student was reassigned to a Master's program in their chosen field and earned a Master's Degree. For purposes of this report, these students are not counted under attrition as a degree was earned.
